

Rocks

There are many different kinds of rock. Different rocks have different characteristics called **properties**. Rocks are used for a variety of purposes based on their properties.

Chalk is a kind of rock. Why do you think it has been used to write on this blackboard?

Describe how we could get more accurate results from these tests.

A graphic of a notepad with ten silver binder rings along the top edge. The notepad is light blue with horizontal lines. A vertical red margin line is on the left side. The text 'To get more accurate results we could:' is written in blue on the first line.

To get more accurate results we could:
